

TPD 90

DEEP FRYER BOIL OUT POWDER

TPD90- Boil Out Powder is specially formulated to remove the toughest of carbon and grease deposits from fryers, cookers and other high temperature cooking equipment. Regular cleaning of deep fryers extends oil life, by helping to eliminate proteins, polar contaminants, and other materials that can affect your oil immediately after it's added, causing it to deteriorate faster. **TPD90's** Non DG - caustic free formula reduces OH&S concerns, is cost effective and easy to use. Refer to **SDS** for further information.

DIRECTIONS FOR USE

Turn the fryer off. Drain all the oil from the fryer and safely discard it via an oil caddy or an approved oil discharge container. Use a fryer cleaning tool to remove any remaining debris out of the drain line. Rinse the fryer with hot water to remove excess undrained oil. Fill the fryer with cool water within 4-5cm of the top, then add recommended dose of **TDP90** to fryer. Boil slowly for 20 mins, **DO NOT HARD BOIL**. Leave to cool, when the solution has cooled use a long handled brush to clean the fryer sides, top and heating elements. Allow the fryer to drain slowly, brush any remaining deposits from elements and sides. Rinse thoroughly with water to remove any residual chemicals, wipe down to completely dry the fryer. Add new oil and continue with normal operation.

10KG - C-TPD90-10

CAUTION: DO NOT MIX WITH PRODUCTS OTHER THAN WATER.

AVOID SKIN CONTACT. Safety gloves, aprons and goggles should be worn whilst handling this product.

5KG - C-TPD90-5

TECHNICAL INFO

Physical Description & colour:	Crystalline Powder
Odour:	Odourless.
Specific Gravity:	1.62
Water Solubility:	Soluble in water.
pH:	11.9 (Strongly alkaline in aqueous solution)

Australian Family Owned and Made
