

# PROTECTOR

## FINAL RINSE SANITISER

**PROTECTOR** - is a combination of highly effective quaternary sanitisers designed for sanitising without the need for a final rinse. It has been specially formulated to leave cleaned surfaces germ free. **PROTECTOR** is specifically used as the final rinse sanitiser at the end of the standard wash program.

### FEATURES AND BENEFITS:

- Improved sanitising performance at lower use concentrations.
- Greater hard water tolerance sanitising activity at lower use levels.
- Superior organic soil tolerance.

### DIRECTIONS FOR USE:

**PROTECTOR** is used at a dose rate of 1: 250 to provide 300 ppm of active quat. At this concentration it has the ability to sanitise without the requirement of a potable water rinse.

Prepare **PROTECTOR** solution into CLEAN water for NO RINSE food contact surface sanitising. Lightly spray surfaces to be sanitised with prepared solution, ensure total contact, especially where shelves or shelf supports meet surface. Avoid leaving "puddles".

Independent Laboratory Testing showed **PROTECTOR** achieved greater than 6 log reductions against E. coli and L. monocytogenes.

Refer to Safety Data Sheet, for more information.

Suitable for use in food preparation areas.

Appearance - Dark Purple Liquid

Fragrance - Nil

Ph - 7

Pack Sizes - 5lt drums

Shelf Life - 6 months when diluted
