

OXY POWDER

SAFETY BLEACH DETERGENT POWDER

OXY POWDER - colour safe bleach is a perborate-based, oxygen-releasing bleaching agent designed to brighten and refresh coloured fabrics without the harsh effects of traditional chlorine based products. This formulation is ideal for non-colourfast and delicate coloured laundry where stain removal and fabric brightness are required without fading or damage.

OXY POWDER is activated by heat, providing outstanding results in hot wash cycles, where it penetrates deep into fibres to lift stains, soils, and dulling residues, safely restoring vibrancy and cleanliness to garments.

FEATURES AND BENEFITS:

- Double-action formula – detergent and whitener.
- Specially designed for non-colourfast and delicate fabrics
- Gentle on fibres – does not weaken fabric like chlorine bleach
- Works efficiently in hot or warm water
- Helps maintain fabric whiteness and brightness
- Suitable for commercial and institutional laundry systems

DIRECTIONS FOR USE:

Dosage and temperature may vary depending on the level of soiling and load size.

Dosage:

Use 10–25g per kg of dry fabric, depending on soiling and fabric condition

Water temperature: Hot wash recommended ($\geq 60^{\circ}\text{C}$) for optimal activation, add to main wash cycle along with regular detergent.

Do not use on wool, silk, or other sensitive fabrics unless tested.

Refer to Safety Data Sheet, for more information.

Appearance - White Powder

Fragrance - Mild Chlorine

pH - 8-9

Pack Sizes - 15kg Pails.

Shelf Life - 2 Years
